Trayhurn P License to Publish – Authors in the *British Journal of Nutrition* Now Retain the Copyright of their Material (Editorial). 1
Olson JA The effects of iron and copper status and of dietary carbohydrates on the activity of rat intestinal β-carotene 15,15'-dioxygenase (Invited commentary). 3
Gariballa SE Nutritional factors in stroke. 5
Wood PJ, Beer MU & Butler G Evaluation of role of concentration and molecular weight of oat β-glucan in determining effect of viscosity on plasma glucose and insulin following an oral glucose load (Short communication). 19
De la Fuente M, Carazo M, Correa R & Del Río M Changes in macrophage and lymphocyte functions in guinea-pigs after different amounts of vitamin E ingestion (Short communication). 25
Wisker E, Daniel M, Rave G & Feldheim W Short-chain fatty acids produced *in vitro* from fibre residues obtained from mixed diets containing different breads and in human faeces during the ingestion of the diets. 31
Elsenhans B & Caspary WF Food viscosity as determinant for adaptive growth responses in rat intestine: long-term feeding of different hydroxyethyl celluloses. 39
Creedon A & Cashman KD The effect of high salt and high protein intake on calcium metabolism, bone composition and bone resorption in the rat. 49
Wolever TMS & Chiasson J-L Acarbose raises serum butyrate in human subjects with impaired glucose tolerance. 57
Birkett AM, Mathers JC, Jones GP, Walker KZ, Roth MJ & Muir JG Changes to the quantity and processing of starchy foods in a Western diet can increase polysaccharides escaping digestion and improve *in vitro* fermentation variables. 63
Getachew G, Makkar HPS & Becker K Effect of polyethylene glycol on *in vitro* degradability of nitrogen and microbial protein synthesis from tannin-rich browse and herbaceous legumes. 73
Ramonet Y, van Milgen J, Dourmad JY, Dubois S, Meunier-Salaün MC & Noblet J The effect of dietary fibre on energy utilisation and partitioning of heat production over pregnancy in sows. 85
Soltani H & Fraser RB A longitudinal study of maternal anthropometric changes in normal weight, overweight and obese women during pregnancy and postpartum. 95
Marangoni F, Agostoni C, Lammardo AM, Giovannini M, Galli C & Riva E Polyunsaturated fatty acid concentrations in human hindmilk are stable throughout 12-months of lactation and provide a sustained intake to the infant during exclusive breastfeeding: an Italian study. 103
Bonofiglio D, Maggiolini M, Catalano S, Marsico S, Aquila S, Giorno A & Andò S Parathyroid hormone is elevated but bone markers and density are normal in young female subjects who consume inadequate dietary calcium. 111
During A, Fields M, Lewis CG & Smith JC Intestinal β-carotene 15,15'-dioxygenase activity is markedly enhanced in copper-deficient rats fed on high-iron diets and fructose. 117
Antipatis C, Grant G & Ashworth CJ Moderate maternal vitamin A deficiency affects perinatal organ growth and development in rats. 125
Maughan RJ Macroelements, Water and Electrolytes in Sports Nutrition (Book review). 133
Henry CJK Training in Food Processing: Successful Approaches (Book review). 133
Schutz Y Human overfeeding experiments: potentials and limitations in obesity research (Invited commentary). 135
Zimmermann M, Adou P, Torresani T, Zeder C & Hurrell R Low dose oral iodized oil for control of iodine deficiency in children (Short communication). 139
Sandström B, Bügel S, Lauridsen C, Nielsen F, Jensen C & Skibsted LH Cholesterol-lowering potential in human subjects of fat from pigs fed rapeseed oil. 143
Kehoe CA, Turley E, Bonham MP, O'Connor JM, McKeown A, Faughnan MS, Coulter JS, Gilmore WS, Howard AN & Strain JJ Response of putative indices of copper status to copper supplementation in human subjects. 151
Obitsu T, Bremner D, Milne E & Lobley GE Effect of abomasal glucose infusion on alanine metabolism and urea production in sheep. 157
Srigiridhar K & Nair KM Supplementation with α-tocopherol or a combination of α-tocopherol

and ascorbic acid protects the gastrointestinal tract of iron-deficient rats against iron-induced oxidative damage during iron repletion. 165
Takahashi Y & Ide T Dietary *n*-3 fatty acids affect mRNA level of brown adipose tissue uncoupling protein 1, and white adipose tissue leptin and glucose transporter 4 in the rat. 175
White P, Cattaneo D & Dauncey MJ Postnatal regulation of myosin heavy chain isoform expression and metabolic enzyme activity by nutrition. 185
Brennan LA, Morris GM, Wasson GR, Hannigan BM & Barnett YA The effect of vitamin C or vitamin E supplementation on basal and H_2O_2-induced DNA damage in human lymphocytes. 195
Noone E, Roche HM, Black I, Tully A-M & Gibney MJ Effect of postprandial lipaemia and Taq 1B polymorphism of the cholesteryl ester transfer protein (CETP) gene on CETP mass, activity, associated lipoproteins and plasma lipids. 203
Taniguchi M, Yasutake A & Takedomi K Effects of dietary sulfur-containing amino acids on oxidative damage in rat liver caused by *N*-nitrosodimethylamine administration. 211
Lluch A, King NA & Blundell JE No energy compensation at the meal following exercise in dietary restrained and unrestrained women. 219
Buemann B, Toubro S, Raben A, Blundell J & Astrup A The acute effect of D-tagatose on food intake in human subjects. 227
Lammert O, Grunnet N, Faber P, Schroll Bjørnsbo K, Dich J, Olesen Larsen L, Neese RA, Hellerstein MK & Quistorff B Effects of isoenergetic overfeeding of either carbohydrate or fat in young men. 233
Huxley RR, Lloyd BB, Goldacre M & Neil HAW Nutritional research in World War 2: The Oxford Nutrition Survey and its research potential 50 years later. 247
Weststrate J Functional foods: cholesterol-lowering benefits of plant sterols (Nutrition Discussion Forum). 253
Thurnham DI Functional foods: cholesterol-lowering benefits of plant sterols – Reply (Nutrition Discussion Forum). 253
Flynn MAT Women Afraid to Eat – Breaking Free in Today's Weight-Obsessed World (Book review). 255
Stratton RJ & Elia M How much undernutrition is there in hospitals? (Invited commentary). 257
Hamilton IMJ, Gilmore WS, Benzie IFF, Mulholland CW & Strain JJ Interactions between vitamins C and E in human subjects. 261
Fuller NJ, Harding M,McDevitt R, Jennings G, Coward WA & Elia M Comparison of recoveries in breath carbon dioxide of $H^{13}CO_3^-$ and $H^{14}CO_3^-$ administered simultaneously by single 6 h constant unprimed intravenous infusion. 269
Lobley GE, Sinclair KD, Grant CM, Miller L, Mantle D, Calder AG, Warkup CC & Maltin CA The effects of breed and level of nutrition on whole-body and muscle protein metabolism in pure-breed Aberdeen Angus and Charolais beef steers. 275
Holemans K, Gerber R, O'Brien-Coker I, Mallet A, Van Bree R, Van Assche FA & Poston L Raised saturated-fat intake worsens vascular function in virgin and pregnant offspring of streptozotocin-diabetic rats. 285
Yasar S & Forbes JM Enzyme supplementation of dry and wet wheat-based feeds for broiler chickens: performance and gut responses. 297
Graulet B, Gruffat-Mouty D, Durand D & Bauchart D Effects of milk diets containing beef tallow or coconut oil on the fatty acid metabolism of liver slices from preruminant calves. 309
Rothenberg EM, Bosaeus IG, Westerterp KR & Steen BC Resting energy expenditure, activity energy expenditure and total energy expenditure at age 91–96 years. 319
Corish CA, Flood P, Mulligan S & Kennedy NP Apparent low frequency of undernutrition in Dublin hospital in-patients: should we review the anthropometric thresholds for clinical practice? 325
Martin A, Normand S, Sothier M, Peyrat J, Louche-Pelissier C & Laville M Is advice for breakfast consumption justified? Results from a short-term dietary and metabolic experiment in young healthy men. 337
Furnée CA, West CE, van der Haar F & Hautvast JGAJ Efficacy of oral iodised oil is associated with anthropometric status in severely iodine-deficient schoolchildren in rural Malawi. 345
Asset G, Leroy A, Bauge E, Wolff RL, Fruchart J-C & Dallongeville J Effects of dietary maritime pine (*Pinus pinaster*)-seed oil on high-density lipoprotein levels and *in vitro* cholesterol efflux in mice expressing human apolipoprotein A-I. 353
Brady LM, Lindquist CH, Herd SL & Goran MI Comparison of children's dietary intake patterns with US dietary guidelines. 361

Rodríguez CA, González J, Alvir MR, Repetto JL, Centeno C & Lamrani F Composition of bacteria harvested from the liquid and solid fractions of the rumen of sheep as influenced by feed intake. 369
Iossa S, Lionetti L, Mollica MP, Crescenzo R, Barletta A & Liverini G Effect of long-term high-fat feeding on energy balance and liver oxidative activity in rats. 377
MacQueen HA, Sadler D & Mattacks C Dietary fatty acids influence the appearance of tumour necrosis factor-α receptors on adipocytes following an immune challenge. 387
Boorman KN The Mineral Nutrition of Livestock (Book review). 393
Hayes KC Dietary fatty acids, cholesterol, and the lipoprotein profile (Invited commentary). 397
Arch J Orexins, feeding and the big picture (Invited commentary). 401
Stubbs RJ, Hughes DA, Johnstone AM, Rowley E, Reid C, Elia M, Stratton R, Delargy H, King N & Blundell JE The use of visual analogue scales to assess motivation to eat in human subjects: a review of their reliability and validity with an evaluation of new hand-held computerized systems for temporal tracking of appetite ratings. 405
Schrauwen P & Westerterp KR The role of high-fat diets and physical activity in the regulation of body weight. 417
Glitsø LV, Mazur WM, Adlercreutz H, Wähälä K, Mäkelä T, Sandström B & Bach Knudsen KE Intestinal metabolism of rye lignans in pigs. 429
Billett MA, Bruce JS, White DA, Bennett AJ & Salter AM Interactive effects of dietary cholesterol and different saturated fatty acids on lipoprotein metabolism in the hamster. 439
Bach Knudsen KE, Jørgensen H & Canibe N Quantification of the absorption of nutrients derived from carbohydrate assimilation: model experiment with catheterised pigs fed on wheat- or oat-based rolls. 449
Lobley GE, Bremner DM & Zuur G Effects of diet quality on urea fates in sheep as assessed by refined, non-invasive [$^{15}N^{15}N$]urea kinetics. 459
Dvir I, Chayoth R, Sod-Moriah U, Shany S, Nyska A, Stark AH, Madar Z & Arad SM Soluble polysaccharide and biomass of red microalga *Porphyridium* sp. alter intestinal morphology and reduce serum cholesterol in rats. 469
Kristensen NB, Gäbel G, Pierzynowski SG & Danfær A Portal recovery of short-chain fatty acids infused into the temporarily isolated and washed reticulo-rumen of sheep. 477
Reverter M, Lundh T, Gonda HL & Lindberg JE Portal net appearance of amino acids in growing pigs fed a barley-based diet with inclusion of three different forage meals. 483
Rummens K, Van Herck E, van Bree R, Bouillon R, Van Assche FA & Verhaeghe J Dietary calcium and phosphate restriction in guinea-pigs during pregnancy: fetal mineralization induces maternal hypocalcaemia despite increased 1α,25-dihydroxycholecalciferol concentrations. 495
Young JF, Dragsted LO, Daneshvar B, Lauridsen ST, Hansen M & Sandström B The effect of grape-skin extract on oxidative status. 505
Menozzi R, Bondi M, Baldini A, Venneri MG, Velardo A & Del Rio G Resting metabolic rate, fat-free mass and catecholamine excretion during weight loss in female obese patients. 515
Green SM, Wales JK, Lawton CL & Blundell JE Comparison of high-fat and high-carbohydrate foods in a meal or snack on short-term fat and energy intakes in obese women. 521
Ribeyre J, Fellmann N, Vernet J, Delaître M, Chamoux A, Coudert J & Vermorel M Components and variations in daily energy expenditure of athletic and non-athletic adolescents in free-living conditions. 531
Robson PJ, Gallagher AM, Livingstone MBE, Cran GW, Strain JJ, Savage JM & Boreham CAG Tracking of nutrient intakes in adolescence: the experiences of the Young Hearts Project, Northern Ireland. 541
Naska A, Vasdekis VGS, Trichopoulou A, Friel S, Leonhäuser IU, Moreiras O, Nelson M, Remaut AM, Schmitt A, Sekula W, Trygg KU & Zajkás G Fruit and vegetable availability among ten European countries: how does it compare with the 'five-a-day' recommendation? 549
Habito RC, Montalto J, Leslie E & Ball MJ Effects of replacing meat with soyabean in the diet on sex hormone concentrations in healthy adult males. 557
Grenby TH & Mistry M Properties of maltodextrins and glucose syrups in experiments *in vitro* and in the diets of laboratory animals, relating to dental health. 565
Bell RC, Carlson JC, Storr KC, Herbert K & Sivak J High-fructose feeding of streptozotocin-diabetic rats is associated with increased cataract formation and increased oxidative stress in the kidney. 575

Freeman P Tyler's Herbs of Choice – The Therapeutic Use of Phytomedicinals (Book review). 583
Astrup A & Raben A Sugar as a slimming agent? (Invited commentary). 585
Grant WB The role of meat in the expression of rheumatoid arthritis. 589
Russell K, Lobley GE, Rawlings J, Millward DJ & Harper EJ Urea kinetics of a carnivore, *Felis silvestris catus*. 597
Ulusoy U & Whitley JE Profiles of faecal output of rare earth elements and stable isotopic tracers of iron and zinc after oral administration. 605
Alvarez MJ, Díez A, López-Bote C, Gallego M & Bautista JM Short-term modulation of lipogenesis by macronutrients in rainbow trout (*Oncorhynchus mykiss*) hepatocytes. 619
Kahn LP & Nolan JV Kinetics of allantoin metabolism in sheep. 629
Pajari A-M, Oikarinen S, Gråsten S & Mutanen M Diets enriched with cereal brans or inulin modulate protein kinase C activity and isozyme expression in rat colonic mucosa. 635
Stangl GI, Schwarz FJ, Müller H & Kirchgessner M Evaluation of the colbalt requirement of beef cattle based on vitamin B_{12}, folate, homocysteine and methylmalonic acid. 645
Hara H, Suzuki T & Aoyama Y Ingestion of the soluble dietary fibre, polydextrose, increases calcium absorption and bone mineralization in normal and total-gastrectomized rats. 655
Boualga A, Bouchenak M & Belleville J Low-protein diet prevents tissue lipoprotein lipase activity increase in growing rats. 663
Baba S, Osakabe N, Natsume M, Yasuda A, Takizawa T, Nakamura T & Terao J Cocoa powder enhances the level of antioxidative activity in rat plasma. 673
Granlund L, Larsen LN, Christiansen EN & Pedersen JI Absorption of very-long-chain saturated fatty acids in totally hydrogenated fish oil. 681
Martin LJM, Dumon HJW, Lecannu G & Champ MMJ Potato and high-amylose maize starches are not equivalent producers of butyrate for the colonic mucosa. 689
Almurshed K & Grunewald K The effects of dietary energy restriction on overloaded skeletal muscle in rats. 697
Garsetti M, Pellegrini N, Baggio C & Brighenti F Antioxidant activity in human faeces. 705
Grolier P, Boirie Y, Levadoux E, Brandolini M, Borel P, Azais-Braesco V, Beaufrère B & Ritz P Age-related changes in plasma lycopene concentrations, but not in vitamin E, are associated with fat mass. 711
Liggins J, Bluck LJC, Runswick S, Atkinson C, Coward WA & Bingham SA Daidzein and genistein contents of vegetables. 717
Jianhua H, Ohtsuka A & Hayashi K Selenium influences growth via thyroid hormone status in broiler chickens. 727
Malaisse WJ, Greco AV & Mingrone G Effects of aliphatic dioic acids and glycerol-1,2,3-tris(dodecanedioate) on D-glucose-stimulated insulin release in rat pancreatic islets. 733
Frape DL, Williams NR, Carpenter KLH, Freeman MA, Palmer CR & Fletcher RJ Insulin response and changes in composition of non-esterified fatty acids in blood plasma of middle-aged men following isoenergetic fatty and carbohydrate breakfasts. 737
Allan AK, Hawksworth GM, Woodhouse LR, Sutherland B, King JC & Beattie JH Lymphocyte metallothionein mRNA responds to marginal zinc intake in human volunteers. 747
Laurant P, Hayoz D, Brunner H & Berthelot A Dietary magnesium intake can affect mechanical properties of rat carotid artery. 757
Perona JS, Portillo MP, Macarulla MT, Tueros AI & Ruiz-Gutiérrez V Influence of different dietary fats on the triacylglycerol deposition in rat adipose tissue. 765
Mazumder RN, Ashraf H, Hoque SS, Kabir I, Majid N, Wahed MA, Fuchs GJ & Mahalanabis D Effect of an energy-dense diet on the clinical course of acute shigellosis in undernourished children. 775
Burdge GC, Wright P, Jones AE & Wootton SA A method for separation of phosphatidylcholine, triacylglycerol, non-esterified fatty acids and cholesterol esters from plasma by solid-phase extraction. 781
Rodriguez JC Topics in International Health, Nutrition (CD ROM review). 789
Satarug S, Haswell-Elkins MR & Moore MR Safe levels of cadmium intake to prevent renal toxicity in human subjects. 791
Cunnane SC The conditional nature of the dietary need for polyunsaturates: a proposal to reclassify 'essential fatty acids' as 'conditionally-indispensable' or 'conditionally-dispensable' fatty acids. 803
Robertson MD, Livesey G, Hampton SM & Mathers JC Evidence for altered control of glucose disposal after total colectomy. 813

Nozière P, Rémond D, Bernard L & Doreau M Effect of underfeeding on metabolism of portal-drained viscera in ewes. 821
Hawley JA, Burke LM, Angus DJ, Fallon KE, Martin DT & Febbraio MA Effect of altering substrate availability on metabolism and performance during intense exercise. 829
Juntunen KS, Mazur WM, Liukkonen KH, Uehara M, Poutanen KS, Adlercreutz HCT & Mykkänen HM Consumption of wholemeal rye bread increases serum concentrations and urinary excretion of enterolactone compared with consumption of white wheat bread in healthy Finnish men and women. 839
Davidsson L, Ziegler EE, Kastenmayer P & Hurrell RF Erythrocyte incorporation of iron by infants: iron bioavailability from a low-iron infant formula and an evaluation of the usefulness of correcting erythrocyte incorporation values, using a reference dose or plasma ferritin concentrations. 847
Nielsen NS, Marckmann P & Høy C-E Effect of meal fat quality on oxidation resistance of postprandial VLDL and LDL particles and plasma triacylglycerol level. 855
Keßler T & Hesse A Cross-over study of the influence of bicarbonate-rich mineral water on urinary composition in comparison with sodium potassium citrate in healthy male subjects 865
Schiavon S & Emmans GC A model to predict water intake of a pig growing in a known environment on a known diet. 873
Loktionov A, Scollen S, McKeown N & Bingham SA Gene–nutrient interactions: dietary behaviour associated with high coronary heart disease risk particularly affects serum LDL cholesterol in apolipoprotein E ε4-carrying free-living individuals. 885
Chango A, Potier de Courcy G, Boisson F, Guilland JC, Barbé F, Perrin MO, Christidès JP, Rabhi K, Pfister M, Galan P, Hercberg S & Nicolas JP 5,10-methylenetetrahydrofolate reductase common mutations, folate status and plasma homocysteine in healthy French adults of the Supplementation en Vitamines et Mineraux Antioxydants (SU.VI.MAX) cohort. 891
Warwick PM & Baines J Point of view: Energy factors for food labelling and other purposes should be derived in a consistent fashion for all food components. 897
Hurrell RF, Reddy MB, Burri J & Cook JD An evaluation of EDTA compounds for iron fortification of cereal-based foods. 903
Lin B-F, Lai C-C, Lin K-W & Chiang B-L Dietary oxidized oil influences the levels of type 2 T-helper cell-related antibody and inflammatory mediators in mice. 911
Beatty ER, O'Reilly JD, England TG, McAnlis GT, Young IS, Halliwell B, Geissler CA, Sanders TAB & Wiseman H Effect of dietary quercetin on oxidative DNA damage in healthy human subjects. 919
Estornell E, Tormo JR, Marín P, Renau-Piqueras J, Timoneda J & Barber T Effects of vitamin A deficiency on mitochondrial function in rat liver and heart. 927
Yeung CHT, Yang L, Huang Y, Wang J & Chen Z-Y Dietary conjugated linoleic acid mixture affects the activity of intestinal acyl coenzyme A: cholesterol acyltransferase in hamsters. 935
Lammert O, Grunnet N, Faber P, Schroll Bjørnsbo K, Dich J, Olesen Larsen L & Quistorff B Sugar as a slimming agent (Letter to the Editors). 943
Johnson GJ Nutritional and Environmental Influences on the Eye (Book review). 945
Soltani H & Fraser RB A longitudinal study of maternal anthropometric changes in normal weight, overweight and obese women during pregnancy and postpartum (Corrigendum). 947
Schrezenmeir J, Korhonen H, Williams CW, Gill HS & Shah N Foreword. S1
Shah N Effects of milk-derived bioactives: an overview. S3
Steijns JM & van Hooijdonk ACM Occurence, structure, biochemical properties and technological characteristics of lactoferrin. S11
Kussendrager KD & van Hooijdonk ACM Lactoperoxidase: physico-chemical properties, occurrence, mechanism of action and applications. S19
Meisel H & FitzGerald RJ Opioid peptides encrypted in intact milk portein sequences. S27
FitzGerald RJ & Meisel H Milk protein-derived peptide inhibitors of angiotensin-I-converting enzyme. S33
Brody EP Biological activities of bovine glycomacropeptide. S39
Molkentin J Occurrence and biochemical characteristics of natural bioactive substances in bovine milk lipids. S47
Löser C Polyamines in human and animal milk. S55
Schlimme E, Martin H & Meisel H Nucleosides and nucleotides: natural bioactive substances in milk and colostrum. S59

Gopal PK & Gill HS Oligosaccarides and glycoconjugates in bovine milk and colostrum. S69
Korhonen H, Marnila P & Gill HS Milk immunoglobulins and complement factors. S75
Cross ML & Gill HS Immunomodulatory properties of milk. S81
Vegarud GE, Langsrud T & Svenning C Mineral-binding milk proteins and peptides; occurrence, biochemical and technological characteristics. S91
Rutherfurd KJ & Gill HS Peptides affecting coagulation. S99
Lindmark-Månsson H & Åkesson B Antioxidative factors in milk. S103
Gill HS, Doull F, Rutherfurd KJ & Cross ML Immunoregulatory peptides in bovine milk. S111
Groziak SM & Miller GD Natural bioactive substances in milk and colostrum: effects on the arterial blood pressure system. S119
van Hooijdonk ACM, Kussendrager KD & Steijns JM *In vivo* antimicrobial and antiviral activity of components in bovine milk and colostrum involved in non-specific defence. S127
Korhonen H, Marnila P & Gill HS Bovine milk antibodies for health. S135
Scholz-Ahrens KE & Schrezenmeir J Effects of bioactive substances in milk on mineral and trace element metabolism with special reference to casein phosphopeptides. S147
Pfeuffer M & Schrezenmeir J Bioactive substances in milk with properties decreasing risk of cardiovascular diseases. S155
Gill HS & Cross ML Anticancer properties of bovine milk. S161
Isemura M Preface. S167
Hoshi T Foreword. S169
Fujimoto WY, Bergstrom RW, Boyko EJ, Chen K-W, Kahn SE, Leonetti DL, McNeely MJ, Newell LL, Shofer JB, Tsunehara CH & Wahl PW Preventing diabetes–applying pathophysiologic and epidemiologic evidence. S173
Kuzuya T Early diagnosis, early treatment and the new diagnostic criteria of diabetes mellitus. S177
Kikkawa R Chronic complications in diabetes mellitus. S183
Sato Y Diabetes and lifestyles: role of physical exercise for primary prevention. S187
Hagura R Diabetes mellitus and lifestyle – for the primary prevention of diabetes mellitus: the role of diet. S191
Ju JS Nutrition in the Republic of Korea. S195
Liu XQ & Li YH Epidemiological and nutritional research on prevention of cardiovascular disease in China. S199
Trichopoulou A & Vasilopoulou E Mediterranean diet and longevity. S205
Mathers JC Dietary strategies to reduce the burden of cancer and cardiovascular disease in the UK. S211
Takase S, Suruga K & Goda T Regulation of vitamin A metabolism-related gene expression. S217
Rocchi S & Auwerx J Peroxisome proliferator-activated receptor γ: linking fat and transcription. S223
Kato S Molecular mechanism of transcriptional control by nuclear vitamin receptors. S229
Hara K, Kubota N, Tobe K, Terauchi Y, Miki H, Komeda K, Tamemoto H, Yamauchi T, Hagura R, Ito C, Akanuma Y & Kadowaki T The role of PPARγ as a thrifty gene both in mice and humans. S235
Noguchi T Protein nutrition and insulin-like growth factor system. S241
Goda T Regulation of the expression of carbohydrate digestion/absorption-related genes. S245
